Atty. Dkt. No. 8591-112

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

1. (Currently Amended) A method of communication for a confined area of a facility, comprising:
 - receiving personal identification information of a guest into at least one of a set of stations distributed throughout the confined area;
 - receiving demographic information regarding the registered guest;
 - continually monitoring movement of the guest over time within the confined area;
 - storing guest movement information; and
 - creating reports on the demographics and continuous movements of the guest.
2. (Original) A method according to claim 1, further including storing information relating to the cashless spending history of the guest at various stations throughout the confined area.
3. (Original) A method according to claim 2, further including determining spending habits of the guest in response to the stored cashless spending history.
4. (Original) A system method according to claim 1, further including sorting information relating to habits of the guest while using the facility as to the demographic information of the guest.

5. (Original) A method according to claim 4, further including storing attraction reservations entered by the guest.
6. (Original) A method according to claim 5, further including creating reports on the cashless spending habits of the guest and on the attraction reservations made by the guest.
7. (Currently Amended) A system of communication for a confined area of a facility, comprising:
 - means for receiving personal identification information of a guest into at least one of a set of stations distributed throughout the confined area;
 - means for receiving demographic information regarding the registered guest;
 - means for continually monitoring movement of the guest over time within the confined area;
 - means for storing guest movement information; and
 - means for creating reports on the demographics and continuous movements of the guest.
8. (Original) A system according to claim 7, further including means for storing information relating to the cashless spending history of the guest at various stations throughout the confined area.
9. (Original) A system according to claim 8, further including means for determining spending habits of the guest in response to the stored cashless spending history.
